Italian Made

I prodotti presenti in questo volume sono progettati e realizzati in Italia secondo i più alti standard qualitativi, nella tutela dell'ambiente, dei diritti e della salute dei lavoratori.

The products in this catalog are designed and produced in Italy according to the highest quality standards, the environmental protection and of course according to the rights and health of employees.

Die Produkte in diesem Katalog wurden in Italien unter Achtung der höchsten Qualitätsanforderungen, des Umweltschutzes und selbstverständlich der Rechte und der Gesundheit der Mitarbeiter entworfen und hergestellt.

GSI ceramica è uno dei principali leader nel settore ceramico italiano e internazionale, azienda innovativa e punto di riferimento per il settore dell'arredobagno. La sua attività risale alle origini della tradizione produttiva del distretto ceramico di Civita Castellana, che ha saputo nel tempo far fronte alle sfide del mercato. In questo contesto i fondatori di GSI ceramica hanno modellato in maniera sapiente la tradizione artigianale insieme con la prorompente innovazione tecnologica in un processo di ricerca e rinnovamento continui, fondati su di un'etica del lavoro ed un sistema di valori che pone al centro dell'attenzione la dimensione umana, ed il saper fare tipico della produttività italiana. Così il rapporto fruttuoso tra imprenditore, progettista, operaio e management ha innescato un circolo virtuoso che consente di offrire prodotti dall'elevato standard qualitativo, secondo quello che è diventato il credo di GSI ceramica, "Italian Made". Soprattutto a partire dagli anni Novanta l'azienda riceve la spinta più forte verso l'innovazione, sotto la guida di un rinnovato management, giovane e preparato, che crede fortemente nel piano di sviluppo avviato, e che sta portando avanti una politica di crescita che vedrà ancora, nel prossimo futuro, GSI ceramica protagonista e interprete del buon Made in Italy.

GSI has always been one of the leader company in Civita Castellana's ceramics industry tradition. Since the 30's GSI has been using its entrepreneurial spirit to overcome market difficulties. In this context the founders of the company have cleverly modelled traditional craftsmanship with evolving technical innovations in a Research and Development process based on a work ethic and value system which focuses on the human insight and know-how typical of Italian industry. In this way there is a productive relationship between investors, management, designers and workers which has led to a virtuous circle enabling us to offer products with a clean designs and high standards of quality, following what has become GSI's byword, "Italian Made". The 90's are those characterized by a greater push towards innovation in a process of transformation that will bring the company to a total refurbishment obtained with considerable investment and aimed at increasing the human capital and technological-productivity. Aiming at obtaining tangible results in terms of innovation is the focus of GSI today thanks to a renewed management team that strongly believes in the new development plan. In a historic moment like today, where caution seems the only way forward, GSI ceramics continues its policy of growth building a bridge to an upcoming future that will see the company as a real protagonist and interpreter of good Made in Italy.

GSI gehört seit jeher zu den führenden Unternehmen in der traditionellen Keramikindustrie von Civita Castellana. Seit den 30er Jahren zeigt GSI Unternehmertegeist und überwindet damit die Schwierigkeiten auf dem Keramikmarkt. In diesem Zusammenhang haben die Unternehmensgründer in kontinuierlicher Forschung und Entwicklung handwerkliche Traditionen mit technischen Innovationen miteinander verbunden. Sie stützen sich dabei auf eine Arbeitsethik und ein Wertesystem, dass die Bedürfnisse des Menschen und das Geschick der italienischen Industrie in den Mittelpunkt stellt. Auf diese Weise entsteht ein produktives Zusammenwirken der Investoren, der Unternehmensleitung, der Designer und der Mitarbeiter und unser gemeinsames Ergebnis sind Produkte mit klarem Design und hohen Qualitätsmaßstäben, die sich im Leitsatz "Italian Made", von GSI manifestieren. Insbesondere in den 90ern wurde ein deutlicher Veränderungsprozess in Richtung Innovation angestoßen, innerhalb dessen das Unternehmen durch beträchtliche Investitionen in sowohl Humanressourcen als auch in technologische Produktivität komplett neu gestaltet wurde. Heute liegt der Fokus von GSI darauf, greifbare Ergebnisse in Sachen Innovation zu erzielen, nicht zuletzt mithilfe des neuen Managementteams, das überzeugt hinter dem jüngsten Entwicklungsplan steht. Mit dieser Wachstumspolitik möchte GSI ceramica auch eine Brücke in die Zukunft schlagen und das Unternehmen als Protagonist und Darsteller des guten "Made in Italy" präsentieren.

Manualità e automazione, artigianalità e tecnologia. I prodotti GSI ceramica sono il risultato di un complesso processo di sviluppo che impiega elevati livelli di tecnologia in ogni sua fase, dalla progettazione computerizzata in 3D alla prototipazione, all'innovativo sistema produttivo in alta pressione, alla smaltatura automatizzata ed al sistema di cottura a 1250°C sempre sotto il severo controllo del personale qualificato addetto alle operazioni di test e verifica. Ogni fase produttiva, ogni singolo articolo vengono testati per rispondere ad un rigido sistema di controllo nel rispetto delle più recenti normative europee di settore. Requisiti tecnici, funzionali ed estetici configurano un sistema di selezione dei prodotti che consente a GSI ceramica di offrire alla sua clientela solo i prodotti qualitativamente migliori dotati di documenti di certificazione CE. Negli ultimi anni l'azienda ha arricchito la sua dotazione produttiva installando impianti di colaggio ad alta pressione, i più innovativi ed efficienti per il settore ceramico. Questa tecnologia, di ultima generazione, permette di monitorare e controllare ogni fase di lavorazione del ciclo produttivo innescando un processo che innalza notevolmente il livello qualitativo del prodotto finito.

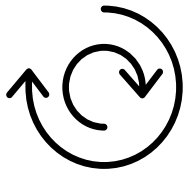

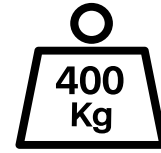

Manual ability and automation, craftsmanship and technology. GSI products are the result of a complex development process which harnesses the latest 3D system technology in every phase of design and prototyping. This is followed by a high pressure production method, automated enamelling and setting in a kiln running at 1250°C. The entire process is supervised in detail by qualified staff who carry out constant quality checking. Each phase of production, and every item produced, is tested against a strict quality control system conforming to the latest European standards. Technical, functional and aesthetic requirements form a selected system of products which allow GSI ceramics to only offer its clientele products that are of high level quality endowed with the certified document CE. Over the last few years, the company has invested in the latest generation production plants; high pressure casting systems which are the most innovative and efficient in the sector. This latest technology, allows a quality improvement and also grants a strict supervision throughout the entire production phase, considerably raising the qualitative standards of the finished product.

Handwerkliches Können und Automatisierung, Kunstfertigkeit und Technologie. Die GSI-Produkte sind das Ergebnis eines vielschichtigen Entwicklungsverfahrens, das in jeder Phase des Entwurfs und der Entwicklung von Prototypen die neueste Technologie des 3D-Systems einsetzt. Es folgen ein Hochdruck-Herstellungsverfahren, eine automatisierte Glasur und das Brennen im Ofen bei 1250°. Der gesamte Prozess wird bis ins Detail von qualifizierten Mitarbeitern überwacht, die durchgängig Qualitätskontrollen durchführen. In jeder Herstellungsphase wird jeder produzierte Artikel entsprechend eines strengen Qualitätssicherungssystems unter Einhaltung der geltenden europäischen Richtlinien getestet. Die Auswahl der Produkte erfolgt nach technischen, funktionalen und ästhetischen Gesichtspunkten, so dass GSI seinen Kunden nur Produkte mit höchster Qualität bietet und mit einer Bescheinigung zur CE-Kennzeichnung versehen kann. Während der vergangenen Jahre hat das Unternehmen in die jüngste Generation von Herstellungsanlagen investiert, wie die Systeme des Hochdruckgusses, die derzeit die innovativsten und effizientesten auf dem Markt sind. Diese neueste Technologie führt zu einer weiteren Qualitätssteigerung durch die nun mögliche, genaue Überwachung während des gesamten Herstellungsprozesses, wodurch die Qualitätsmaßstäbe des Endprodukts deutlich erhöht werden.

save water

swirlflush®

Silenzioso, igienico, pulito.
Silent, hygienic, clean.
Still, hygienisch, sauber.

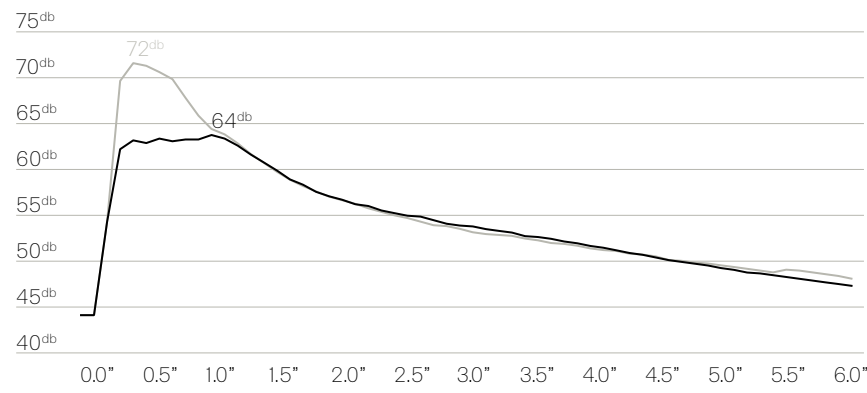

La costante volontà di migliorare le qualità dell'ambiente bagno, ha portato i tecnici di GSI a studiare e sviluppare il rivoluzionario sistema di scarico Swirlflush®. La caratteristica più evidente è l'assenza della tradizionale bordatura, la brida, all'interno della quale, in un normale wc, circola l'acqua al momento dello scarico. La particolare conformazione del sistema Swirlflush® direziona l'acqua sulle superfici ceramiche in maniera uniforme, assicurando una pulizia ottimale, migliorando le performance di scarico e riducendo al minimo il rumore. Il design Swirlflush®, non presentando parti nascoste o difficili da raggiungere, facilita inoltre le normali operazioni di pulizia del sanitario. Questo, combinato al rivestimento ceramico Extraglaze®, che rende le superfici estremamente levigate e lisce, garantisce un'igiene ottimale con il minimo sforzo.

With a constant desire to enhance the quality of the bathroom, GSI engineers have studied and developed the revolutionary Swirlflush® flushing system. The most evident characteristic is the absence of the traditional edge, the rim, inside which, in a standard WC, water circulates when flushing. The special shape of the Swirlflush® system steers flush water evenly on ceramic surfaces, ensuring perfect cleansing and better draining, and minimising noise. The Swirlflush® design has no hidden or difficult to reach parts, and thus routine cleaning operations are made easier. This, combined with the Extraglaze® coating, makes surfaces extremely smooth, ensuring perfect hygiene with the minimum effort.

Das konstante Streben nach Verbesserung der Badezimmerqualität hat die Techniker von GSI dazu veranlasst, das revolutionäre Spülsystem Swirlflush® zu entwickeln. Dessen Hauptmerkmal besteht im Fehlen des traditionellen Spülrandes, durch den bei einem normalen WC das Wasser beim Spülen geleitet wird. Die besondere Gestaltung des Swirlflush® Systems richtet das Wasser gleichmäßig auf die Keramikoberflächen und sichert dadurch optimale Sauberkeit bei zugleich verbesserter Spüleistung und geringerer Geräuschentwicklung. Da das Design von Swirlflush® keine verborgenen oder schwer erreichbaren Teile beinhaltet, werden ferner die normalen Reinigungsvorgänge des WCs erleichtert. Dies garantiert in Kombination mit der Keramikbeschichtung Extraglaze®, die für extrem polierte und glatte Oberflächen sorgt, optimale Hygiene bei minimalem Einsatz.

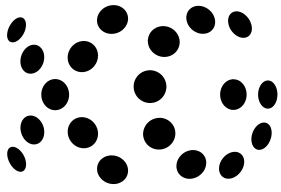

Il nuovo sistema di risciacquo SwirlFlush®, con una rumorosità di soli 64db, garantisce estrema silenziosità durante la fase di scarico.
Swirlflush® new flushing system with a noise level of just 64dB, is extremely quiet during the flushing performance.
Das neue Spülsystem, hat einen Geräuschpegel von nur 64 dB und garantiert damit extrem leises Spülen.

Standard WC
SwirlFlush®

Extraglaze® è un nuovo smalto ceramico che, riducendo al minimo la formazione di pori superficiali, rende le superfici ceramiche più levigate, brillanti e facilmente lavabili. Extraglaze® viene applicato ai prodotti durante il ciclo di produzione e prima della loro cottura. In questo modo il nuovo smalto è parte integrante della ceramica ed i suoi effetti permanenti. I prodotti trattati con Extraglaze® sono più resistenti agli agenti chimici, e grazie all'estrema levigatezza e brillantezza, sono protetti da calcare e batteri e rimangono pulite più a lungo.

Extraglaze® is a new ceramic glaze which by minimizing the formation of surface pores, makes the ceramic surfaces smoother, brighter and easily washable.

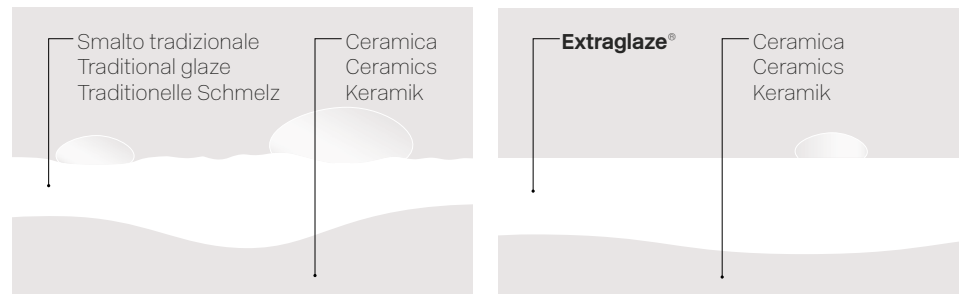

Extraglaze® is applied to the products during the production cycle and prior to their firing. In this way, the new enamel is an integral part of the ceramic and its permanent effects.

The products treated with the ExtraGlaze® are more resistant to chemicals, and thanks to the extreme smoothness and brightness, they are protected from bacteria and limestone and stay clean longer.

Bei Extraglaze® handelt es sich um eine Keramikglasur, die die Bildung von Oberflächenporen reduziert und somit die Keramikoberflächen glatter, glänzender und pflegeleichter macht.

Extraglaze® wird auf die Produkte während der Herstellung und vor dem Brennen aufgetragen. Auf diese Weise ist die Glasur ein Bestandteil der Keramik und dauerhaft wirksam.

Die mit Extraglaze® behandelten Produkte sind resistenter gegen Chemikalien und dank der glatten und glänzenden Oberfläche sind sie besser vor Bakterien und Kalkstein geschützt und bleiben länger.

Qualità: superfici ceramiche tecnicamente avanzate, resistenti agli agenti chimici, levigate e brillanti, mantengono queste caratteristiche inalterate nel tempo.

Quality: technically advanced ceramic surfaces, chemical-resistant, smooth and shiny, which keep these characteristics unchanged in time.

Qualität: technisch fortschrittliche, chemikalienfeste, polierte und glänzende Keramikoberflächen, die diese Eigenschaften unverändert auf lange Zeit bewahren.

Efficienza: grazie all'estrema planarità delle superfici, l'acqua scivola molto più facilmente migliorando notevolmente le operazioni di risciacquo e scarico.

Efficiency: thanks to the extreme flatness of the surfaces, the water flows much easier, dramatically improving the rinsing and flushing operations.

Effizienz: dank der extremen Ebenheit der Oberflächen rinnt das Wasser sehr viel leichter ab, wodurch die Spül- und Abflussvorgänge erheblich verbessert werden.

Igiene: l'estrema planarità micrometrica delle superfici riduce enormemente l'accumulo di sporco e calcare, garantendo di conseguenza una pulizia e un'igiene ottimali.

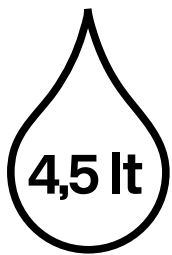

Hygiene: the extreme micrometric flatness of the surfaces enormously reduces the accumulation of dirt and limestone, thereby ensuring an optimal cleaning and hygiene. **Hygiene:** die extreme mikrometrische Ebenheit der Oberflächen reduziert das Entstehen von Schmutz- und Kalkablagerungen stark, wodurch optimale Sauberkeit und Hygiene garantiert werden.

Sostenibilità: Extraglaze® consente un minor consumo di acqua e detersivi per le comuni operazioni di pulizia.

Sustainability: Extraglaze® allows a minor use of water and detergents during common cleaning. **Nachhaltigkeit:** Extraglaze® sorgt für verringerten Verbrauch an Wasser und Reinigungsmitteln für die gewöhnlichen Reinigungsvorgänge.

save water

L'acqua è un diritto, sprecarla è un delitto
Water is a right, wasting it is a crime
Wasser ist ein Recht,
Wasserverschwendung ist eine Straftat.

Con la volontà di preservare il bene più prezioso che ci appartiene, GSI progetta tutti i sanitari integrando lo speciale sistema di scarico "Save Water". Il sistema, creato dall'ufficio stile GSI ceramica, è frutto di un continuo lavoro di sviluppo e perfezionamento tecnico, ed è ottenuto grazie alla particolare conformazione delle parti ceramiche a contatto con l'acqua. Il sistema "Save Water" consente di eseguire le funzioni di scarico con soli 4,5 lt di acqua. Nel presente catalogo il logo "Save Water" individua i wc che sono dotati dell'efficiente sistema di scarico a 4,5 lt.

Aiming to preserve the most valuable asset that we have, GSI designs all its sanitary ware with the special flush system "Save Water". The system, created by the GSI design team, is the result of continuous technical development and is achieved thanks to the special shape of the ceramic parts directly in contact with water. The "Save Water" system allows you to flush with just 4,5 litres of water. In this catalogue the logo "Save Water" identifies toilets that have this system implemented.

Zum Schutz der wertvollsten Ressource des Menschen stattet GSI die gesamte Sanitärkeramik mit dem besonderen Spülsystem "Save Water" aus. Das vom GSI-Designerteam entworfene System ist das Ergebnis einer kontinuierlichen technischen Entwicklung und beruht auf der besonderen Form der Keramikteile, die in direktem Kontakt mit dem Wasser sind. Dank des "Save Water"-Systems werden beim Spülen nur 4,5 Liter verbraucht. In diesem Katalog sind die Toiletten mit diesem System mit dem Logo "Save Water" gekennzeichnet.

quickrelease

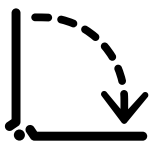

GSI ceramica introduce un nuovo copriwater con un innovativo sistema di installazione. Il nuovo sistema "Quick Release" si contraddistingue per la facilità con cui permette di estrarre il copriwater in maniera semplice e senza l'impiego di utensili di alcun genere. È sufficiente tirare il copriwater verso l'alto esercitando una forza sufficiente alla sua estrazione. In questo modo sarà possibile eseguire le operazioni di pulizia del copriwater e del wc anche nelle superfici generalmente difficili da raggiungere garantendo una maggiore igiene. Altrettanto semplice sarà il riposizionamento del copriwater: una volta posizionato in corrispondenza delle cerniere sarà sufficiente esercitare una pressione relativamente debole. In abbinamento al sistema di chiusura soft-close i copriwater GSI raggiungono livelli di efficienza e comfort senza precedenti. Il sistema soft-close predispone il copriwater per una chiusura rallentata. Questo consentirà di evitare cadute accidentali e chiusure del copriwater troppo violente garantendo comfort ed evitando danni accidentali.

GSI ceramica introduces a new seat & cover with an innovative installation system. The new "Quick Release" system is distinguished by the simplicity with which it allows to pull out the seat & cover in a simple way and without the use of any kind of tool. Simply pull the seat and cover up using a sufficient force for its removal. This will make it possible to clean the toilet seat and even the wc in areas that are usually difficult to reach, granting a major hygiene. Repositioning the seat & cover is as simple; once placed on the hinges, it will be sufficient to employ a relatively weak pressure. Matching up with the soft-close system, the GSI seat and covers reach levels of efficiency and comfort never reached before. The soft-close system predisposes the seat and cover for a slow closing. This will prevent accidental falls and violent closures of the seat and cover, preventing damages.

GSI ceramica führt einen neuen WC-Sitz mit einem innovativen Installationssystem ein. Das neue „Quick Release“ System unterscheidet sich von anderen durch die Einfachheit, mit der der WC-Sitz ohne den Einsatz von Werkzeugen abgenommen werden kann. Einfach den WC-Sitz mit ausreichend Kraft zum Hochheben entfernen. So kann der WC-Sitz und das WC auch an Stellen gereinigt werden, die normalerweise schwierig zu erreichen sind, und die Hygiene ist verbessert. Das Zurücksetzen des WC-Sitzes ist genauso leicht: einfach auf die Scharniere platzieren und mit leichtem Druck einsetzen. In Verbindung mit dem Soft Close-Mechanismus ist der WC-Sitz so funktionsfähig und bequem wie nie zuvor. Der Soft Close-Mechanismus sorgt dafür, dass der WC-Sitz langsam schließt. Dadurch wird verhindert, dass der Sitz versehentlich oder zu heftig auf die Brille fällt und diese beschädigt werden.

dual white

Con Dual White, GSI coniuga igiene ed eleganza conferendo un tratto originale e distintivo ai propri sanitari. La tecnologia Dual White, che combina la smaltatura opaca alla lucida, è la novità indirizzata ad una clientela attenta ai particolari e alle innovazioni sul mercato. La purezza della finitura opaca incontra, nelle parti idrauliche a contatto con l'acqua, la smaltatura Extraglaze®, evitando macchie ed antigienici residui calcarei, frequenti conseguenze della tipica porosità del prodotto in ceramica con un'unica finitura opaca. Al contrario, la levigatezza delle superfici ceramiche smaltate con Extraglaze® diminuisce l'attrito che l'acqua incontra durante la fase di scarico del wc, migliorandone le performance e riducendo sensibilmente il consumo di acqua. Oltre a ciò, il connubio Extraglaze®/Swirlflush® arricchisce ulteriormente la dotazione del wc: efficienza dello scarico, silenziosità, maggior igiene e pulizia derivante dall'assenza della brida. Setosa, materica, sofisticata e di tendenza, la finitura Dual White esalta alla perfezione le morbide linee della collezione Pura.

GSI has combined hygiene and elegance in its Dual White range, giving sanitaryware an original and distinctive touch. Dual White technology combines gloss and matt glazes in a range of products aimed at customers with an eye for detail and for innovation.

Where parts come into contact with water, the purity of the matt finish meets our Extraglaze® enamel, designed to prevent unhygienic lime deposits, a frequent phenomenon due to the porous nature of ceramic products having a single matt finish. The smoothness of ceramic surfaces coated with Extraglaze® enamel reduces the friction encountered by water when the WC is flushed, enhancing its performance and significantly reducing water consumption. The Extraglaze®/Swirlflush® double act further enhances the WC: efficient, quiet flushing, greater hygiene and cleanliness due to the rimless bowl. Silky, tactile, sophisticated and stylish, the Dual White finish is a perfect ally for the soft lines of the Pura collection.

Bei Dual White kombiniert GSI Hygiene mit Eleganz und verleiht dadurch den Sanitärobjekten einen unterscheidenden Zug. Die Dual-White-Technologie, bei der Matt- und Glanzglasur miteinander verbunden werden, stellt die Neuheit dar, die sich an Kunden mit einem besonderen Augenmerk für innovative Details wendet.

Die Reinheit der matten Oberflächen trifft bei den im Kontakt mit Wasser stehenden Teilen auf die Glasur Extraglaze®, dank der Fleckenbildung und unhygienische Kalkablagerungen verhindert werden, die oftmals Folge jener typischen Porosität von Keramikprodukten mit einheitlich matt glasierter Oberfläche sind. Im Gegensatz dazu verringert die Glätte der mit Extraglaze® glasierten Keramikflächen die Reibung, auf die das Wasser in der Spülphase des WCs stößt, wodurch die Leistung verbessert und der Wasserverbrauch reduziert wird. Zusätzlich bereichert die Kombination Extraglaze®/Swirlflush® die Ausstattung des WCs weiter: effiziente und zugleich leise Spülung, verbesserte Hygiene und Sauberkeit dank des fehlenden Spülrands. Seidig, stofflich, raffiniert und tendenzweisend: Dual White hebt die Perfektion und die sanften Linien der Kollektion Pura hervor.

Nel mondo In the world Weltweit

Situata nel cuore del principale distretto ceramico in Italia per la produzione di sanitari, GSI trae dalla tradizione tutta la sua vitalità, il suo carattere dinamico ed il suo spirito intraprendente. Innovazione, design ed apertura verso l'esterno hanno consentito a GSI, nel corso del tempo, di intessere una rete di relazioni internazionali con clienti, partner commerciali, ed estimatori in senso più ampio che permette all'azienda di essere partecipe ed interprete del Made in Italy anche fuori dal mercato domestico con la partecipazione ad eventi, convegni e progetti per il contract come testimoniano il Tiara Chateau Hotel di Parigi, il Madinat Jumeirah di Dubai, il Vip Grand di Lisbona, il Yas Marina di Abu Dhabi e molti altri.

Located in the heart of Italy's primary ceramic sanitary ware production district, GSI draws its vitality, dynamism and enterprising spirit from this tradition. Innovation, design and being open to new trends has allowed GSI, over time, to weave a network of international relationships with clients, commercial partners and fans that allows the company to be a leading exponent of the Made in Italy brand outside the domestic market thanks to its presence at events, conferences and various projects such as the Tiara Chateau Hotel in Paris, Madinat Jumeirah in Dubai, Vip Grand Lisbon, Yas Marina in Abu Dhabi and many more.

GSI hat seinen Sitz im Herzen von Italiens größter Industriezone für Sanitärkeramik und zieht aus dieser Tradition seine Vitalität, seine Dynamik und seinen Unternehmergeist. Mit Innovation, Design und Aufgeschlossenheit gegenüber neuen Trends hat GSI im Laufe der Zeit ein Netzwerk internationaler Geschäftsbeziehungen mit Kunden, Handelspartnern und Bewunderern geschaffen und sich außerhalb des italienischen Markts dank der Teilnahme an Events, Konferenzen und verschiedener Projekte, wie dem Tiara Chateau Hotel in Paris, dem Madinat Jumeirah in Dubai, dem Vip Grand Lisboa Hotel und Yas Marina in Abu Dhabi, als führender Vertreter der Marke "Made in Italy" einen Namen gemacht.

Oltre che nel mercato domestico italiano, dove viene destinato il 53% del materiale prodotto, GSI ceramica è presente nei mercati internazionali dove colloca il 47% della sua produzione, in particolare nei paesi Europei, nei paesi emergenti dell'Est, nell'area Asiatica ed Araba fino alla Nuova Zelanda. Sostenuta dalla spinta della domanda di prodotti di qualità superiore, GSI ceramica prosegue nella sua politica di espansione nella fascia più evoluta dei diversi mercati.

Other than the national Italian market, where 53% of the produced material is destined, GSI is also present in the international markets where it sets 47% of its production, in particular in the European countries, the emerging countries of the East, in the Asiatic and Arab countries up-to New Zealand. Supported by the push of demand of products with high quality, GSI continues in its policy of expanding in the most evolved range of different markets.

Neben dem nationalen italienischen Markt, für den 53% der Produkte bestimmt sind, ist GSI auch mit 47% seiner Produktion auf den internationalen Märkten vertreten, darunter insbesondere die europäischen Länder, die aufstrebenden Länder im Osten, die asiatischen und arabischen Länder bis hin zu Neuseeland. Geflügelt von der starken Nachfrage nach hoch qualitativen Produkten setzt GSI seinen Wachstumstrend in den hoch entwickelten Bereichen verschiedener Märkte fort.

Sand

Sand

Sand è una collezione di sanitari dal carattere distintivo. Il suo design è fondato sull'idea progettuale di creare prodotti affascinanti. Già nel nome si intuisce l'intento creativo che si materializza in prodotti dalle forme sinuose e morbide ad evocare quelle delle immense distese sabbiose che per contrasto richiamano alla mente il flusso dell'acqua che scorre nei catini avvolgenti dei lavabi e dei sanitari Sand.

Sand is a sanitary ware range characterized by unique features. Its design is based on the idea of creating attractive products. From its name it is easy to picture the inspiration that was transformed into the sinuous and soft shapes of the range: deserted sandy beaches and the flow of water in the enveloping shape of Sand basins and sanitary ware.

Sand ist eine Sanitärkeramik-Serie mit einzigartigen Merkmalen. Das Design beruht auf der Idee, attraktive Produkte zu schaffen. Schon vom Namen ist ganz einfach die Inspirationsquelle abzuleiten, die sich in den geschmeidigen und weichen Formen des Sortiments widerspiegelt: leere Sandstrände und der Wasserfluss eingebettet in den Formen der Sand Becken und Badkeramik.

Norm

Norm è la proposta minimalista di GSI ceramica, una collezione destinata ad un pubblico dal gusto evoluto che apprezza la purezza delle forme, le linee semplici e regolari prive di orpelli o segni inutili. I rapporti dimensionali, le caratteristiche di funzionalità e la declinazione nelle varie misure suggeriscono l'idea di una famiglia di sanitari capace di soddisfare innumerevoli esigenze di spazio e di personalizzazione. Inoltre, la predisposizione per l'abbinamento con accessori e arredi, rende possibile la creazione di un ambiente bagno piacevole, elegante, funzionale, minimalista.

Norm is GSI's minimalist offering, for the client with taste who appreciates simplicity. It is a simple range with nothing superfluous, nothing ornamental. Its multiple dimensions and functionality comprise a sanitary range which can be customised to meet a wide range of spaces and requirements. Once combined with accessories and fixtures, this range creates a pleasing, functional elegant and minimal bathroom space.

GSI hat Norm für Minimalisten entworfen, für Kunden mit Geschmack, die die Einfachheit schätzen. Es ist eine schlichte Serie ohne Überflüssiges und ohne Schnörkel. Diese Sanitärkeramik ist in zahlreichen Maßen und Funktionen erhältlich und kann so auf den einzelnen Kunden und sein Platzangebot und seine individuellen Anforderungen zugeschnitten werden. Kombiniert mit Zubehör und Inventar schafft diese Serie eine angenehme, funktionale, elegante und schlichte Badezimmerumgebung.

Kube

In linea con la rinnovata tendenza stilistica di GSI ceramica, Kube afferma con decisione il nuovo profilo progettuale dell'azienda. L'unicità formale della collezione esprime una solidità propria degli oggetti dal carattere forte. Con Kube GSI ceramica propone lavabi installabili ad appoggio, incasso, semincasso o sospensione.

In line with the renewed stylistic trend of GSI Ceramics, Kube strongly asserts the company's new profile. The uniqueness of the collection expresses a real solidity typical of products with strong character. With Kube GSI proposes ceramic washbasins available counter top built-in semi-recessed and wall-hung fitting.

Im Einklang mit den jüngsten Trends bei GSI Ceramica steht der Stil von Kube für das neue Profil des Unternehmens. Die Einzigartigkeit der Kollektion drückt sich in der Robustheit aus, die für Produkte mit starkem Charakter typisch ist. In der Serie Kube präsentiert GSI Waschbecken, die sowohl als Aufsatz-, Einbau-, Halbeinbau- und Wandwaschbecken erhältlich sind.

Pura

La collezione Pura si distingue per la razionalità progettuale e l'eleganza delle scelte stilistiche. Forme sobrie, che sapientemente bilanciano linee rette e morbidi arrotondamenti, frutto di un lungo lavoro di messa a punto a livello di design. La purezza minimalista delle linee fornisce ai prodotti appartenenti alla collezione di sanitari un'eleganza contemporanea ed una connotazione di lusso e raffinatezza secondo i valori di semplicità e accuratezza che contraddistinguono lo stile GSI.

The Pura collection is characterized by rational design and stylish elegance. Conservative shapes that skillfully balance straight lines and soft rounding are the result of a long design and development process. The understated purity of the lines gives the products in this range a contemporary elegance and a touch of luxury and refinement that fits with the simple but tasteful style of GSI.

Die Pura Kollektion ist durch ihr schlichtes Design und ihre stilvolle Eleganz gekennzeichnet. Zurückhaltende Formen, die kunstvoll gerade Linien und weiche Rundungen vereinen, sind das Ergebnis eines langen Design- und Entwicklungsprozesses. Die zarten und klaren Linien verleihen den Produkten dieser Serie eine zeitgenössische Eleganz und einen Hauch von Luxus und Raffinesse, die zum klaren aber geschmackvollen Stil von GSI passen.

Modo

La collezione Modo ha un aspetto inconfondibile, grazie ad un profilo dinamico, a linee pulite e proporzionate che integrano eleganza ed armonia in maniera seducente. Modo offre un elevato standard qualitativo grazie ad un attento bilanciamento tra design, materiali di alta qualità ed elementi di confort in grado di soddisfare le esigenze dell'utente. Lavabi con bacini capienti, predisposizione per l'aggiunta di portasciugamani, possibilità di installazioni multiple, sospensione, incasso su piano o mobile. Wc per installazione a sospensione, con sistema di scarico a 4,5 litri d' acqua e copriwater disponibili anche con sistema di chiusura rallentata (soft-close). Tutto della collezione Modo è stato pensato per soddisfare le esigenze dei clienti GSI.

The Modo collection has a unique shape which seductively combines elegance and harmony thanks to its dynamic outline and its simple, proportional lines. Modo ensures high quality standards thanks to the perfect balance between design, high quality materials and convenient features to meet users' needs. Washbasins have ample bowls, with the option to add a towel rail, and there are multiple configurations available, such as wall-hung, inset or on a base cabinet or free standing. Wall-hung Wc provided with 4,5 litre waste system and toilet seat also available with soft-closing system. In this collection GSI ceramics has invested all its efforts to satisfy customers' needs.

Die Modo Kollektion hat eine einzigartige Form, die auf verführerische Weise mit ihren dynamischen Konturen und den proportionalen Linien Eleganz und Harmonie kombiniert. Modo gewährleistet hohe Qualitätsmaßstäbe aufgrund des perfekten Ausgleichs zwischen Design, hochwertigen Materialien und angenehmen Funktionen, die alle Anforderungen des Nutzers erfüllen. Die Waschbecken verfügen über weite Schalen und können optional mit einem Handtuchhalter ausgestattet werden. Sie sind als Wand-, Einbau-, Aufsatzwaschbecken und freistehende Waschbecken erhältlich. Das wandhängende WC mit 4,5 l Spülsystem ist auch mit WC-Sitz mit Soft Close-Mechanismus erhältlich. In dieser Kollektion bietet GSI Ceramica alles, was die Kundenanforderungen erfüllt.

Classic

La collezione Classic esprime l'idea di eleganza secondo GSI ceramica attraverso un linguaggio subito riconoscibile per i tratti stilistici richiamati dai prodotti che fanno parte della famiglia di sanitari.

Un linguaggio non a caso classico che caratterizza sia i lavabi che i sanitari e la vasca da bagno con forme equilibrate ed armoniose di chiara ispirazione neoclassica. Prodotti senza tempo, dunque, che possono arredare l'ambiente bagno ricreando atmosfere tradizionali di eleganza e stile, ed in grado di evocare nuove forme di romanticismo così come dimostrano i nuovi sanitari sospesi.

The Classic collection exudes GSI's interpretation of elegance through the immediately recognizable stylistic traits of this product range: the classic shape of the washbasins, toilets, bidets and bath tubs, the products have balanced, harmonious shapes with obvious neoclassical inspiration. These are timeless products, which can furnish the bathroom recreating traditional atmosphere of stylish elegance, and to evoke new forms of romanticism as reflected in the new wall-hung sanitaryware.

Die Classic Kollektion verströmt die Eleganz nach der Interpretation von GSI über die sofort erkennbaren Stilmerkmale der Produktreihe: Als klassische Form der Waschbecken, WCs, Bidets und Badewannen haben die Produkte eine ausgewogene, harmonische Gestalt und sind offensichtlich vom Neoklassizismus inspiriert. Sie sind zeitlose Produkte, die Badezimmer mit einer traditionellen Atmosphäre stilvoller Eleganz ausstatten und neue romantische Formen wie in der neuen wandhängenden Sanitärkeramik aufweisen.

Community

Community è la proposta GSI ceramica per l'ambiente bagno pubblico e collettivo. Si tratta di una collezione di sanitari che offre delle soluzioni molto particolari sia in termini di design che dal punto di vista delle possibilità di impiego. Community prevede una linea di prodotti per un'utenza diversamente abile.

Community is GSI's product range for the public environment. The collection offers specific solutions in terms of design and use. The Community collection includes a series for disabled users.

Community ist die Produktserie von CSI für öffentliche Bereiche. Die Kollektion bietet besondere Lösungen hinsichtlich Design und Gebrauch. Zu der Community Kollektion gehört auch eine Serie für behinderte Nutzer.
